REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: The amendment filed on September 07, 2004, in response to final rejection is entered. The new search has been made for a polymerization of monomer(s) having a polydispersity of from about 1.8 to about 1.9 and the molar ratio of the stable free radical (SFR) agent to free radical initiator (INIT) that is less than 0.1 (present claim 34) and in the range of 0.005 to 0.05 (for the present claim 4).

The closest prior art is still Patent 5,610,250 to Veregin et al. However, Verigin discloses the molar ratio of (SFR) agent to free radical initiator (INIT) residing in the monomer phase is from about 0.5 to 5.0, column 24, lines 9-12. There is no motivation or direction in the prior art to lead a person having ordinary skill in the art to define the ratio of (SFR) : (INIT) of less than 0.1.

Claims 4, 6 and 8-34 are deemed to contain allowable subject matter.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Olga Asinovsky whose telephone number is 571-272-1066. The examiner can normally be reached on 9:00 to 5:30 pm.
